

Storage that moves to the tempo of any IT demands

Managing and maintaining infrastructure for customers, in particular the storage element, can be complex, challenging and continually changing.

Take a tiered approach to storage and find the right storage combination of HPE Storage models, based on your business needs. Orchestrate business transformation to conduct business however it's needed, with HPE's Storage portfolio.

Because tiered storage makes business sense.

Finding the right storage combination

The HPE Storage Selector Tool will help you develop the right storage combinations by using a tiered approach. In 3 easy steps you can find the right combination to suit any business needs.

Step 1

Based on the importance of speed to access data and cost, **SELECT** the Primary, Secondary and Archiving HPE Storage models that best match the need.

Step 2

Shortlist your storage selection, **EXPLORE** and compare the features and benefits of each storage type, helping you make a more informed decision.

Step 3

Work with your Ingram Micro Storage Specialist to help **CONFIGURE**, build and deploy a tiered storage solution that's tailored to any need. They'll make sure you access the best offers and related promotions available to you.

Business Benefits

Accelerate your speed to market, massively improve operational efficiency and expand capabilities & offerings to your customers increasing revenue and margins.

Operational Benefits

Build and deploy integrated storage solutions, simplify and power infrastructure change, take advantage of hybrid and multi-cloud capabilities and offer a more complex level of IT services.

Key Advantages

With an array of models to choose from, the HPE Storage Portfolio offers lots of advantages:

- Reduce complexity, eliminate tradeoffs and improve business agility
- AI-led operations that predict and prevent disruption and self-optimize app performance and resource management
- Deliver resiliency, performance and scalability for mission-critical apps
- Enables self-install and self-upgrade in minutes and provide a 100% availability guarantee

Make data storage work for you with HPE & Ingram Micro

Ingram Micro are here to help you unlock more than the value of data storage - gain the flexibility & agility to conduct business how you want with the HPE Storage Selector Tool, to find the right storage combination based on your business needs.

Speak to **Jack Savage, Ingram Micro HPE Business Manager**, to help configure, build and deploy a tiered storage solution that's designed specifically for your needs. They'll also make sure you access the best offers and related promotions available to you.
