# Introducing <br> Aruba Instant On 1960 Switches 

## HIGH PERFORMANCE, STACKABLE SWITCHES

## BENEFITS

Switches simplify the deployment of wired devices like surveillance cameras and wireless access points by allowing you to connect and power network endpoints over a single Ethernet cable, without having to install separate power supplies. Because network performance is critical to small business success, you need a simple networking solution that offers blazing fast, secure connections at a price that won't break the bank.

The Aruba Instant On 1960 Switch Series empowers you to do more. Affordable and easy-to-deploy, these smart-managed, stackable Gigabit switches with 10-gigabit connectivity deliver maximum throughput in small business networks for demanding tasks such as data storage, video on-demand and high-bandwidth processing. Stacking and advanced switching features protect your IT investment by ensuring your network is ready for the next generation of applications and devices.

SET UP YOUR SWITCH IN MINUTES
Get step-by-step guidance via the Aruba Instant On mobile app

MANAGE IT ANYTIME, ANYWHERE
Monitor and manage performance with the Aruba Instant On mobile app or cloud-based web portal

CONNECT AND POWER HIGH-BANDWIDTH DEVICES THROUGH ONE CABLE
Save time and money and get the flexibility you crave with Power over Ethernet (Class 4 and Class 6 PoE) technology

SECURE YOUR DATA AND INFORMATION
Keep your business safe with ever-evolving security measures and protocols
STACK UP TO FOUR SWITCHES
Stackable switches allow you to scale as your business grows. Auto failover creates a safety net so that if one switch in the stack fails, all other switches will be intact.

## AT A GLANCE

## MORE ABOUT 1960 SWITCHES

The Aruba Instant On 1960 Switch Series consists of five switches with 24- and 48-port configurations offering Gigabit performance with a choice of non-PoE and PoE (Class 4 PoE and Class 6 PoE on selected ports) models and a 12 port 10-Gigabit aggregation switch with 12 10GBASE-T and 4 SFP+ uplink ports. The 24- and 48-port models include (2) SFP+ and (2) 10GBase-T uplink ports for reliable 10G connectivity.
